TT-63-18181

Trans. of Paperi ja Puu (Finland) 1941, v. 23, no. 15
[p. 293-300]. (Abstract available)

DESCRIPTORS: *Paper, Moisture, Tensile properties,
Hysteresis, Manufacturing methods,

The moisture absorbed by paper from the atmosphere
is dependent on the type of fibre used and also on the
method of beating and drying; varies considerably at
different r.h. levels and temperatures. At r.h. levels
above 70% the moisture absorption of paper begins to
rise steeply. In comparing the water content of paper
in an atmosphere of both increasing and decreasing
moisture content one can clearly observe the appear-
ance of hysteresis phenomenon. It is difficult to ob-
